Outerlimits Offshore Powerboats, celebrating its 15th anniversary, has become synonymous with quality, luxury and outstanding performance. Recognized as the most prestigious high performance boating company, Outerlimits fills a unique niche by delivering custom, made to order powerboats, ranging from 39' to 51' in both vee-hull and catamaran models. Post-cured epoxy composite construction, unique hull design and the most luxurious amenities available are designed into each and every craft.

The 2008 41 Super Leggera, Outerlimits newest model, exemplifies Outerlimits' blend of R&D and custom design. While offshore racing both in the U.S. and internationally, Outerlimits finely-tuned its race boat and recently debuted the 41 SL as a sleek, fast and agile recreational boat--race-bred, perfect for pleasure. The striking, low-profile hull is aerodynamic and the precisely crafted bottom is designed for smooth running in rough water. "The cornering ability of the 41 SL is absolutely amazing," says Mike Fiore, owner and president, "We are proud of the design, engineering, construction and reliability of our entire line and adding this model offers our customers another choice." Beyond the exterior, the luxurious interior features a full cabin with v-berths, stand-up head with shower and all the amenities Outerlimits is known for.
